## Attachment to Advisory Action

1. The amendment cancellation claims 34-35 would obviate the rejection under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement

2. The rejection under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement would be maintained for new claim 38 for reasons of record.

Applicants argue that the diseases in claim 38 are all GI diseases in which 5-HT is known to be implicated. On the contrary, a 5HT-4 receptor agonist useful for treating all the recited diseases has not been described. Indeed an umbrella drug for treating all the recited diseases (including gastrointestinal disease, which embraces neoplasm, appendicitis, and conflicting and opposing conditions) is not known at the time of the invention.

- 3. The rejection for Claims 15-28, 32-35 under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention would be withdrawn in view of the amendment obviating the rejection.
- 4. Claims 15-31, 36, 37 would be allowed.

Uchida (6624162) discloses a 5 HT4 receptor binding piperidinyl-imidazopyridne compound similar to the instant. Uchida's piperidinyl is substituted by hydrogen, alkyl or alkoxyalkyl, whereas the alkyl on the piperidinyl in the instant compound is required to be substituted by one or two substituents not taught by Uchida. Absent is the motivation to modify the prior art compound to arrive at the instant invention.
